We have audited the Internal Financial Controls over Financial Reporting of MAA DURGA EXPRESSWAYS PRIVATE LIMITED ("the Company") as of March 31, 2018 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of the internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of internal Financial Controls Over financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Meaning of Internal Financial Controls over Financial Reporting

An internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on audit of Internal financial Controls Over Financial Reporting issued by the ICAI".

Notes to the Financial Statements

1. Significant Accounting Policies

1.6 PROVISION AND CONTINGENT LIABILITIES

The Company recognises a provision when there is a present obligation as a result of a past event that probably required an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources or there is present obligation, reliable estimate of the amount of which cannot be made. Where there is a possible obligation or a present obligation and the likelihood of outflow of resources is remote, no provision or disclosure for contingent liability is made.

1.7 CURRENT TAX

Current tax is the amount of income taxes payable in respect of taxable profit for a period. Current tax is measured using tax rates that have been enacted by the end of reporting period for the amounts expected to be recovered from or paid to the taxation authorities.

1.8 REVENUE RECOGNITION

Contract revenue is recognised under percentage of completion method. The stage of completion is determined on the basis of completion of physical proportion of the contract work. Extra work and variation in contract (as mutually agreed), to the extent that it is probable that they will result in revenue and can be reliably measured is also covered. Future expected loss, if any, is recognised as expenditure.

Dividend Income on investment is accounted for when the right to receive the payment is established

Interest income is recognised using the Effective Interest Rate (EIR) method.

1.9 CLAIMS AND COUNTER CLAIMS

Claims and Counter claims (related to customers), including those under arbitration are accounted for on their final disposal. Other contract related claims are recognised when there is reasonable certainty as to their recoverability.

1.10 EARNING PER SHARE

Earnings considered in ascertaining the Company's earnings per share is the net profit or loss for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, if any, that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

Note 11 (b): Fair value hierarchy

Amount in.Rs

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

	At 31 March 2018				At 31 March 2017			
Financial assets and liabilities measured at fair value - recurring fair value measurements	Level I	Level II	Level III	Total	Level I	Level II	Level III	Total
Financial assets								
Financial Investments at FVPL								
Investments in Mutual Funds	773,418	-	-	773,418	739,871	-	-	739,871
Total Financial Assets	773,418	-	-	773,418	739,871	-	-	739,871

Level I: Level I hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, Mutual funds that have quoted price. The fair value of all equity instruments which are traded in the stock exchanges is valued using the closing price as at the reporting period. The Mutual fund are valued using the closing NAV.

Level II: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level II.

Level III: If one or more of the significant inputs is not based on observable market data, the instrument is included in level III

12 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

a) Credit risk

Credit risk refers to risk that a counterparty will default on its contractual obligation resulting in financial loss to the company. Credit risk arises primarily from financial assets such as Trade Receivables, Bank Balances and Other Financial Assets.

At each reporting date, the Company measures loss allowance for certain class of financial assets based on historical trend, industry practices and the business environment in which the Company operates.

Credit risk arising from investment and Bank Balances is limited because the counterparties are banks and recognised companies with high credit worthiness.

b) Liquidity risk

Liquidity risk is the risk that the Company will face in meeting its obligations associated with financial liabilities and are settled by delivering cash and other financial assets. The Company manages its liquidity risk by ensuring that the cash and banks balances and other sources are adequate to meet its working capital requirements.

The table below provides details regarding the contractual maturities of significant financial liabilities as of 31 March 2018.

Contractual maturities of financial liabilities	Less Than 1 year	1-2 year	2-4 years	4 years & above	Total
Non-derivatives					
Trade payables	3,190,144				3,190,144
Others	-				-

Others	8,200				8,200
Total non-derivative liabilities	5,192,794	-	-	-	5,192,794

c) Market risk

Market risk is the risk that the fair value of future cash flows of financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: Interest rate risk, currency risk and other price risk.

i) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate due to changes in foreign exchange rates. The Company is not exposed to foreign currency risk as all of its transactions are in Indian Rupee.

ii) Interest rate risk

Interest rate risk arises when the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As the Company has no variable interest-bearing assets or liabilities, the Company's income, expenses and cash flows are independent of changes in market interest rates.

iii) Other price risk

The Company's exposure to securities price risk arises from investments in mutual funds held by the Company and classified in the balance sheet as FVPL.

The sensitivity of profit or loss to changes in Net Asset Value (NAVs) as at year end for investments in mutual funds.

Particulars	F.Y 2017 -18	F.Y 2016 -17
